

Scenofest workshop Creating A Geolocated Soundwalk

Onboarding information

Items to bring and prepare:

1) smartphone or tablet

We will run the soundwalk app (called 'Echoes') on this.
The device can be either iOS (Apple) or Android.
Please install the app in advance.

Apple App store link:

<https://apps.apple.com/gb/app/echoes-interactive-sound-walks/id1021511722>

Google Play store link:

https://play.google.com/store/apps/details?id=xyz.echoes.android&hl=en_GB

If you are from abroad you don't need a working cell phone plan, we can use wi-fi and the built-in GPS of the devices.

2) laptop

We will edit and upload sound on this.

In terms of software you will need a web browser (like Google Chrome or Firefox) and a program for sound editing. It does not need to be a powerful computer and if you don't have a program for sound editing yet I can suggest Audacity which is free (open source) and available for MacOS, Windows and Linux.

There are no specific safety advisories but be advised that we will be outside for a part of the workshop.
